SPC POWER CORPORATION

NOTES TO PARENT COMPANY FINANCIAL STATEMENTS

1. Corporate Information

SPC Power Corporation (the Parent Company), formerly Salcon Power Corporation, was incorporated in the Republic of the Philippines and registered with the Philippine Securities and Exchange Commission (SEC) on March 11, 1994.

The Parent Company was formerly a venture company owned by members of the Salcon Consortium which entered into a Rehabilitation, Operation, Maintenance and Management Agreement (ROMM Agreement) with the National Power Corporation (NPC) on March 25, 1994 for the purpose of undertaking the rehabilitation, operation, maintenance and management of the 203.8 megawatt (MW) Naga Power Plant Complex (NPPC) in Colon, Naga, Cebu under the rehabilitate-operate-maintain-and-manage scheme as defined in the ROMM Agreement.

Under the ROMM Agreement, the Parent Company, at its own cost, rehabilitated, operated, maintained and managed the NPPC over the cooperation period of 15 years (Cooperation Period: up to May 29, 2009 for the Land-Based Gas Turbines (LBGTs), and up to March 25, 2012 for the Cebu Thermal Power Plant (CTPP) 1, CTPP 2 and Cebu Diesel Power Plants 1 (CDPP 1), as amended).

In resolutions dated September 28, 2001, the Board of Directors (BOD) and Stockholders amended the primary purposes for which the Parent Company is formed. Together with its subsidiaries and associates, it is engaged in various business activities within the Philippines that include, among others, the development, construction, rehabilitation, maintenance, management and operation of power generating plants, electricity distribution and related facilities in accordance with existing laws.

On April 2, 2002, the Parent Company's common shares were listed in the Philippine Stock Exchange (PSE) (see Note 17).

On September 9, 2016, the Parent Company's BOD further amended the Parent Company's Articles of Incorporation in order to engage in the business of selling, brokering, marketing, or aggregating electricity to the end users. The amendments were subsequently approved and confirmed by written consent of the stockholders representing at least two-thirds of the outstanding capital stock of the Parent Company. On January 4, 2017, the SEC approved such amendment.

The registered office address of the Parent Company is 7th Floor, Cebu Holdings Center, Archbishop Reyes Avenue, Cebu Business Park, Cebu City.

The financial statements of the Parent Company were authorized for issue by the BOD on April 4, 2019.

2. Summary of Significant Accounting Policies

Basis of Preparation

The Parent Company's financial statements have been prepared on a historical cost basis, except for financial assets at FVOCI which have been measured at fair value, and are presented in Philippine Peso, the Parent Company's functional currency. All amounts are rounded to the nearest Peso except as otherwise indicated.

The Parent Company also prepares and issues consolidated financial statements for the same period as the separate financial statements presented in accordance with Philippine Financial Reporting Standards (PFRSs). These may be obtained at SEC Building, V. Rama Avenue, Englis, Guadalupe, Cebu City.

Statement of Compliance

The Parent Company's financial statements are presented in accordance with the PFRSs.

Changes in Accounting Policies and Disclosures

The accounting policies adopted are consistent with those of the previous financial year, except for the following new and revised standards and Philippine Interpretations which were applied starting January I, 2018. Unless otherwise indicated, the adoption did not have any significant impact on the financial statements of the Parent Company.

PFRS 9, Financial Instruments

PFRS 9 reflects all phases of the financial instruments project and replaces PAS 39, Financial Instruments: Recognition and Measurement, and all previous versions of PFRS 9. The standard introduces new requirements for classification and measurement, impairment, and hedge accounting. Retrospective application is required, but comparative information is not compulsory. For hedge accounting, the requirements are generally applied prospectively, with some limited exceptions.

The Parent Company has adopted this new standard without restating comparative information.

As of January 1, 2018, the Parent Company has reviewed and assessed all of its existing financial instruments. The following table reconciles the carrying amounts of financial assets, from their previous measurement category in accordance with PAS 39 to their new measurement categories upon transition to PFRS 9 on January 1, 2018, and prior period's closing impairment allowance measured in accordance with PAS 39 to the opening impairment allowance determined in accordance with PFRS 9 as of January 1, 2018:

Financial Assets	Original Measurement Category Under PAS 19	Original Carrying Amount under PAS 39	Replassification	Remeasurement	New Messurement Category Under PFRS 9	New Carrying Amount under PFRS 9
Cash and cash equivalents	Loans and receivables	P1,047,835,364	P1,047,835,364	P	Financial assets at amortized cost	P1,047,835,364
Investment in proprietary club shares	AFS investments	1,300,000	1,300,000	3,700,000	Financial assets at FVOCI	5,900,000
Trade and other receivables	Loans and receivables	108,107,798	108,107,798	-	Financial assets at amortized cost	108,107,793
Due from NPC/PSALM	Loans and receivables	1,175,128	1,175,128	117	Financial assets at amortized cost	1,175,128
Due from related parties	Loans and receivables	2,757,502	2,757,502	_	Financial assets at amortized cost	2,757,502
Nonourrent receivable (included in "Other Nonourrent Assets")	Loans and receivables	1,143,240,000	1,143,240,000	-	Financial assets at amortized cost	1,143,240,000

The effects of adoption on the parent company financial statements are as follows:

	As at January 1, 2018
Increase (decrease) in parent company statement of financial position:	
AFS investment	(1,300,000)
Financial asset at FVOCI	5,000,000
Total Assets	₱3,700,000
Net unrealized valuation losses on AFS investment Net unrealized valuation gain on financial asset at	(₱350,000)
FVOCI	3,350,000
Total Liabilities and Equity	₱3,700,000

As of December 31, 2018 and 2017, the Parent Company does not hold financial liabilities designated at fair value through profit or loss.

PFRS 15, Revenue from Contracts with Customers

PFRS 15 supersedes PAS 11, Construction Contracts, PAS 18, Revenue, and related Interpretations and it applies to all revenue arising from contracts with customers, unless those contracts are in the scope of other standards. PFRS 15 establishes a new five-step model that will apply to revenue arising from contracts with customers. The new standard establishes a five-step model to account for revenue arising from contracts with customers. The five-step model is as follows:

- Identify the contract(s) with a customer
- 2. Identify the performance obligations in the contract
- 3. Determine the transaction price
- 4. Allocate the transaction price to the performance obligations in the contract
- Recognize revenue when (or as) the entity satisfies a performance obligation.

Under PFRS 15, revenue is recognized at an amount that reflects the consideration to which an entity expects to be entitled in exchange for transferring goods or services to a customer.

The standard requires entities to exercise judgement, taking into consideration all of the relevant facts and circumstances when applying each step of the model to contracts with the customers. The standard also specifies the accounting for the incremental costs of obtaining a contract and the costs directly related to fulfilling a contract.

The adoption of PFRS 15 has no impact to the parent company statements of financial position, statements of comprehensive income and statements of cash flows.

 Amendments to PFRS 2, Share-based Payment, Classification and Measurement of Share-based Payment Transactions

The amendments to PFRS 2 address three main areas: the effects of vesting conditions on the measurement of a cash-settled share-based payment transaction; the classification of a share-based payment transaction with net settlement features for withholding tax obligations; and the accounting where a modification to the terms and conditions of a share-based payment transaction changes its classification from cash settled to equity settled.

On adoption, entities are required to apply the amendments without restating prior periods, but retrospective application is permitted if elected for all three amendments and if other criteria are met.

These amendments are not applicable to the Parent Company since it has no share-based payment arrangements.

 Amendments to PFRS 4, Insurance Contracts, Applying PFRS 9, Financial Instruments, with PFRS 4

The amendments address concerns arising from implementing PFRS 9, the new financial instruments standard before implementing the new insurance contracts standard. The amendments introduce two options for entities issuing insurance contracts: a temporary exemption from applying PFRS 9 and an overlay approach. The temporary exemption is first applied for reporting periods beginning on or after January 1, 2018. An entity may elect the overlay approach when it first applies PFRS 9 and apply that approach retrospectively to financial assets designated on transition to PFRS 9. The entity restates comparative information reflecting the overlay approach if, and only if, the entity restates comparative information when applying PFRS 9.

The amendments are not applicable to the Parent Company since it is not engaged in the insurance business.

 Amendments to PAS 28, Measuring an Associate or Joint Venture at Fair Value (Part of Annual Improvements to PFRSs 2014–2016 Cycle)

The amendments clarify that an entity that is a venture capital organization, or other qualifying entity, may elect, at initial recognition on an investment-by-investment basis, to measure its investments in associates and joint ventures at fair value through profit or loss. They also clarify that if an entity that is not itself an investment entity has an interest in an associate or joint venture that is an investment entity, the entity may, when applying the equity method, elect to retain the fair value measurement applied by that investment entity associate or joint venture to the investment entity associate's or joint venture's interests in subsidiaries. This election is made separately for each investment entity associate or joint venture, at the later of the date on which (a) the investment entity associate or joint venture is initially recognized; (b) the associate or joint venture becomes an investment entity; and (c) the investment entity associate or joint venture first becomes a parent.

These amendments are not applicable to the Parent Company since the company is not a venture capital organization or an investment entity, nor does the Parent Company has investment entity associates or joint ventures.

Amendments to PAS 40, Investment Property, Transfers of Investment Property

The amendments clarify when an entity should transfer property, including property under construction or development into, or out of investment property. The amendments state that a change in use occurs when the property meets, or ceases to meet, the definition of investment property and there is evidence of the change in use. A mere change in management's intentions for the use of a property does not provide evidence of a change in use. The amendments should be applied prospectively to changes in use that occur on or after the beginning of the annual reporting period in which the entity first applies the amendments. Retrospective application is only permitted if this is possible without the use of hindsight.

These amendments are not applicable to the Parent Company since it does not own any investment property.

 Philippine Interpretation IFRIC 22, Foreign Currency Transactions and Advance Consideration

The interpretation clarifies that, in determining the spot exchange rate to use on initial recognition of the related asset, expense or income (or part of it) on the derecognition of a nonmonetary asset or nonmonetary liability relating to advance consideration, the date of the transaction is the date on which an entity initially recognizes the nonmonetary asset or nonmonetary liability arising from the advance consideration. If there are multiple payments or receipts in advance, then the entity must determine a date of the transactions for each payment or receipt of advance consideration. Entities may apply the amendments on a fully retrospective basis. Alternatively, an entity may apply the interpretation prospectively to all assets, expenses and income in its scope that are initially recognized on or after the beginning of the reporting period in which the entity first applies the interpretation or the beginning of a prior reporting period presented as comparative information in the financial statements of the reporting period in which the entity first applies the interpretation.

Since the Parent Company's current practice is in line with the clarifications issued, the Parent Company does not expect any effect on its financial statements.

New Standards and Interpretation Issued and Effective after December 31, 2018

The Parent Company will adopt the pronouncements enumerated below when these become effective. Except as otherwise indicated, the Parent Company does not expect the future adoption of the said pronouncements will have a significant impact on its financial statements.

Effective Beginning on or After January 1, 2019

Amendments to PFRS 9, Prepayment Features with Negative Compensation

Under PFRS 9, a debt instrument can be measured at amortized cost or at fair value through other comprehensive income, provided that the contractual cash flows are 'solely payments of principal and interest on the principal amount outstanding' (the SPPI criterion) and the instrument is held within the appropriate business model for that classification. The amendments to PFRS 9 clarify that a financial asset passes the SPPI criterion regardless of the event or circumstance that causes the early termination of the contract and irrespective of which party pays or receives reasonable compensation for the early termination of the contract. The amendments should be applied retrospectively and are effective from January 1, 2019, with earlier application permitted.

These amendments have no impact on the financial statements of the Parent Company.

PFRS 16, Leases

PFRS 16 sets out the principles for the recognition, measurement, presentation and disclosure of leases and requires lessees to account for all leases under a single on-balance sheet model similar to the accounting for finance leases under PAS 17, *Leases*. The standard includes two recognition exemptions for lessees - leases of 'low-value' assets (e.g., personal computers) and short-term leases (i.e., leases with a lease term of 12 months or less). At the commencement date of a lease, a lessee will recognize a liability to make lease payments (i.e., the lease liability) and an asset representing the right to use the underlying asset during the lease term (i.e., the right-of-use asset). Lessees will be required to separately recognize the interest expense on the lease liability and the depreciation expense on the right-of-use asset.

Lessees will be also required to remeasure the lease liability upon the occurrence of certain events (e.g., a change in the lease term, a change in future lease payments resulting from a change in an index or rate used to determine those payments). The lessee will generally recognize the amount of the remeasurement of the lease liability as an adjustment to the right-of-use asset.

Lessor accounting under PFRS 16 is substantially unchanged from today's accounting under PAS 17. Lessors will continue to classify all leases using the same classification principle as in PAS 17 and distinguish between two types of leases: operating and finance leases.

PFRS 16 also requires lessees and lessors to make more extensive disclosures than under PAS 17.

Early application is permitted, but not before an entity applies PFRS 15. A lessee can choose to apply the standard using either a full retrospective or a modified retrospective approach. The standard's transition provisions permit certain reliefs.

In 2018, the Parent Company performed a preliminary impact assessment of PFRS 16. Based on the initial assessment, the Parent Company does not expect a significant impact to the financial statements.

Amendments to PFRS 9, Prepayment Features with Negative Compensation

The amendments to PFRS 9 allow debt instruments with negative compensation prepayment features to be measured at amortized cost or fair value through other comprehensive income. An entity shall apply these amendments for annual reporting periods beginning on or after January 1, 2019. Earlier application is permitted.

The Parent Company expects that adoption of these amendments will not have any impact to its financial statements since it does not have debt instruments with negative compensation prepayment features.

Amendments to PAS 28, Long-term Interests in Associates and Joint Ventures

The amendments to PAS 28 clarify that entities should account for long-term interests in an associate or joint venture to which the equity method is not applied using PFRS 9. An entity shall apply these amendments for annual reporting periods beginning on or after January 1, 2019. Earlier application is permitted.

The Parent Company is currently assessing the impact of adopting these amendments.

Philippine Interpretation IFRIC 23, Uncertainty over Income Tax Treatments

The interpretation addresses the accounting for income taxes when tax treatments involve uncertainty that affects the application of PAS 12 and does not apply to taxes or levies outside the scope of PAS 12, nor does it specifically include requirements relating to interest and penalties associated with uncertain tax treatments.

The interpretation specifically addresses the following:

- Whether an entity considers uncertain tax treatments separately;
- The assumptions an entity makes about the examination of tax treatments by taxation authorities;
- How an entity determines taxable profit (tax loss), tax bases, unused tax losses, unused tax credits and tax rates; and
- How an entity considers changes in facts and circumstances.

An entity must determine whether to consider each uncertain tax treatment separately or together with one or more other uncertain tax treatments. The approach that better predicts the resolution of the uncertainty should be followed.

The Parent Company is currently assessing the impact of adopting this interpretation and expects that it will have no effect on its financial statements.

Amendments to PAS 19, Employee Benefits, Plan Amendment, Curtailment or Settlement

The amendments to PAS 19 address the accounting when a plan amendment, curtailment or settlement occurs during a reporting period. The amendments specify that when a plan amendment, curtailment or settlement occurs during the annual reporting period, an entity is required to:

- Determine current service cost for the remainder of the period after the plan amendment, curtailment or settlement, using the actuarial assumptions used to remeasure the net defined benefit liability (asset) reflecting the benefits offered under the plan and the plan assets after that event
- Determine net interest for the remainder of the period after the plan amendment, curtailment
 or settlement using: the net defined benefit liability (asset) reflecting the benefits offered
 under the plan and the plan assets after that event; and the discount rate used to remeasure
 that net defined benefit liability (asset).

The amendments also clarify that an entity first determines any past service cost, or a gain or loss on settlement, without considering the effect of the asset ceiling. This amount is recognized in profit or loss. An entity then determines the effect of the asset ceiling after the plan amendment, curtailment or settlement. Any change in that effect, excluding amounts included in the net interest, is recognized in other comprehensive income.

The amendments apply to plan amendments, curtailments, or settlements occurring on or after the beginning of the first annual reporting period that begins on or after January 1, 2019, with early application permitted. The Parent Company does not expect any effect on its financial statements since the Parent Company's current practice is in line with these amendments.

Annual Improvements to PFRSs 2015-2017 Cycle

 Amendments to PFRS 3, Business Combinations, and PFRS 11, Joint Arrangements, Previously Held Interest in a Joint Operation

The amendments clarify that, when an entity obtains control of a business that is a joint operation, it applies the requirements for a business combination achieved in stages, including remeasuring previously held interests in the assets and liabilities of the joint operation at fair value. In doing so, the acquirer remeasures its entire previously held interest in the joint operation.

A party that participates in, but does not have joint control of, a joint operation might obtain joint control of the joint operation in which the activity of the joint operation constitutes a business as defined in PFRS 3. The amendments clarify that the previously held interests in that joint operation are not remeasured.

An entity applies those amendments to business combinations for which the acquisition date is on or after the beginning of the first annual reporting period beginning on or after January 1, 2019 and to transactions in which it obtains joint control on or after the beginning of the first annual reporting period beginning on or after January 1, 2019, with early application permitted.

These amendments are currently not applicable to the Parent Company but may apply to future transactions.

 Amendments to PAS 12, Income Tax Consequences of Payments on Financial Instruments Classified as Equity

The amendments clarify that the income tax consequences of dividends are linked more directly to past transactions or events that generated distributable profits than to distributions to owners. Therefore, an entity recognizes the income tax consequences of dividends in profit or loss, other comprehensive income or equity according to where the entity originally recognized those past transactions or events.

An entity applies those amendments for annual reporting periods beginning on or after January 1, 2019, with early application is permitted. These amendments are not relevant to the Parent Company.

Amendments to PAS 23, Borrowing Costs, Borrowing Costs Eligible for Capitalization

The amendments clarify that an entity treats as part of general borrowings any borrowing originally made to develop a qualifying asset when substantially all of the activities necessary to prepare that asset for its intended use or sale are complete.

An entity applies those amendments to borrowing costs incurred on or after the beginning of the annual reporting period in which the entity first applies those amendments. An entity applies those amendments for annual reporting periods beginning on or after January 1, 2019, with early application permitted.

The Parent Company does not expect any effect on its financial statements once it is adopted since the Parent Company's current practice is in line with these amendments.

Effective Beginning On or After January 1, 2020

Amendments to PFRS 3, Definition of a Business

The amendments to PFRS 3 clarify the minimum requirements to be a business, remove the assessment of a market participant's ability to replace missing elements, and narrow the definition of outputs. The amendments also add guidance to assess whether an acquired process is substantive and add illustrative examples. An optional fair value concentration test is introduced which permits a simplified assessment of whether an acquired set of activities and assets is not a business.

An entity applies those amendments prospectively for annual reporting periods beginning on or after January 1, 2020, with earlier application permitted.

These amendments will apply to future business combinations of the Parent Company.

 Amendments to PAS 1, Presentation of Financial Statements, and PAS 8, Accounting Policies, Changes in Accounting Estimates and Errors, Definition of Material

The amendments refine the definition of material in PAS 1 and align the definitions used across PFRSs and other pronouncements. They are intended to improve the understanding of the existing requirements rather than to significantly impact an entity's materiality judgements.

An entity applies these amendments prospectively for annual reporting periods beginning on or after January 1, 2020, with earlier application permitted.

Effective Beginning on or After January 1, 2021

PFRS 17, Insurance Contracts

PFRS 17 is a comprehensive new accounting standard for insurance contracts covering recognition and measurement, presentation and disclosure. Once effective, PFRS 17 will replace PFRS 4, *Insurance Contracts*. This new standard on insurance contracts applies to all types of insurance contracts (i.e., life, non-life, direct insurance and re-insurance), regardless of the type of entities that issue them, as well as to certain guarantees and financial instruments with discretionary participation features. A few scope exceptions will apply.

The overall objective of PFRS 17 is to provide an accounting model for insurance contracts that is more useful and consistent for insurers. In contrast to the requirements in PFRS 4, which are largely based on grandfathering previous local accounting policies, PFRS 17 provides a comprehensive model for insurance contracts, covering all relevant accounting aspects. The core of PFRS 17 is the general model, supplemented by:

 A specific adaptation for contracts with direct participation features (the variable fee approach)

 A simplified approach (the premium allocation approach) mainly for short-duration contracts

PFRS 17 is effective for reporting periods beginning on or after January 1, 2021, with comparative figures required. Early application is permitted. The new standard has no impact on the financial statements of the Parent Company because it is not engaged in the insurance business.

Deferred Effectivity

Amendments to PFRS 10, Consolidated Financial Statements, and PAS 28, Sale or Contribution
of Assets between an Investor and its Associate or Joint Venture

The amendments address the conflict between PFRS 10 and PAS 28 in dealing with the loss of control of a subsidiary that is sold or contributed to an associate or joint venture. The amendments clarify that a full gain or loss is recognized when a transfer to an associate or joint venture involves a business as defined in PFRS 3. Any gain or loss resulting from the sale or contribution of assets that does not constitute a business, however, is recognized only to the extent of unrelated investors' interests in the associate or joint venture.

On January 13, 2016, the Financial Reporting Standards Council deferred the original effective date of January 1, 2016 of the said amendments until the International Accounting Standards Board (IASB) completes its broader review of the research project on equity accounting that may result in the simplification of accounting for such transactions and of other aspects of accounting for associates and joint ventures.

Cash and Cash Equivalents

Cash consists of cash on hand and in banks. Cash equivalents are short-term, highly liquid investments that are readily convertible to known amounts of cash with original maturities of three (3) months or less from dates of acquisition and that are subject to an insignificant risk of change in value.

Financial Instruments - Initial Recognition and Subsequent Measurement (Prior to the Adoption of PFRS 9)

Date of Recognition. Purchases or sales of financial assets that require delivery of assets within the time frame established by regulation or convention in the marketplace are recognized on the trade date - the date on which the Parent Company commits to purchase or sell the asset.

Initial Recognition of Financial Instruments. The Parent Company recognizes a financial asset or financial liability in the parent company statement of financial position when it becomes a party to the contractual provisions of the instrument. In the case of a regular way purchase or sale of financial assets, recognition and derecognition, as applicable, is done using settlement date accounting.

All financial instruments, including loans and receivables, are initially measured at fair value. Except for financial assets and liabilities valued at fair value through profit or loss (FVPL), the initial measurement of financial assets and liabilities includes transaction costs. The Parent Company classifies its financial assets in the following categories: financial assets at FVPL, held-to-maturity (HTM) investments, loans and receivables and AFS investments. Financial liabilities are classified into financial liabilities at FVPL and other financial liabilities. The classification depends on the purpose for which the investments were acquired and whether they are quoted in an active market. Management determines the classification of its investments at initial recognition and, where allowed and appropriate, re-evaluates such designation at every reporting date.

Financial instruments are classified as liabilities or equity in accordance with the substance of the contractual arrangement. Interest, dividends, gains and losses relating to a financial instrument or a component that is a financial liability, are reported as expense or income.

As of December 31, 2017, the Parent Company has no financial assets and financial liabilities at FVPL and HTM investments.

Loans and Receivables. Loans and receivables are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market. They are not entered into with the intention of immediate or short-term resale and are not classified as financial assets held for trading, designated as AFS investments or designated at FVPL. This accounting policy relates to the Parent Company's cash and cash equivalents, trade and other receivables, due from NPC/PSALM and due from related parties and noncurrent receivable included as part of "other noncurrent assets" in the parent company statement of financial position as of December 31, 2017 (see Notes 4, 5, 6, 7 and 13).

Receivables are recognized initially at fair value, which normally pertains to the billable amount. After initial measurement, loans and receivables are measured at amortized cost using the effective interest method, less allowance for impairment losses. Amortized cost is calculated by taking into account any discount or premium on acquisition and fees that are an integral part of the effective interest rate (EIR). The losses arising from impairment of receivables are recognized in the parent company statement of comprehensive income. Any effect of restatement of foreign-currency-denominated assets is recognized in "Others - net" in the parent company statement of comprehensive income.

Loans and receivables are included in current assets if maturity is within 12 months from the reporting date. Otherwise, these are classified as noncurrent assets.

AFS Financial Assets. AFS financial assets are those non-derivative financial assets that are designated in this category or are not classified in any of the three preceding categories. These are purchased and held indefinitely, and may be sold in response to liquidity requirements, or changes in market conditions. After initial recognition, AFS financial assets are measured at fair value with unrealised gains or losses being recognized as other comprehensive income and as other equity reserve until the investment is derecognised or until the investment is determined to be impaired at which time the cumulative gain or loss previously reported in the other comprehensive income and as other equity reserve is included in the parent company statement of comprehensive income and as other equity reserve under finance costs. AFS financial assets are classified as noncurrent unless the intention is to dispose such assets within 12 months from the reporting date.

As of December 31, 2017, included under this category is the Parent Company's investment in proprietary club shares presented under "Other noncurrent assets" in the parent company statement of financial position (see Note 13).

Other Financial Liabilities. Issued financial instruments or their components, which are not designated as liabilities at FVPL are classified as other financial liabilities, where the substance of the contractual arrangement results in the Parent Company having an obligation either to deliver cash or another financial asset to the holder, or to satisfy the obligation other than by the exchange of a fixed amount of cash or another financial asset for a fixed number of own equity shares. After initial measurement, other financial liabilities are subsequently measured at amortized cost using the effective interest method.

Amortized cost is calculated by taking into account any discount or premium on the issue and fees that are an integral part of the EIR. Any effect of restatement of foreign-currency-denominated liabilities is recognized in "Others - net" in the parent company statement of comprehensive income.

This accounting policy applies primarily to the Parent Company's trade and other payables, due to NPC/PSALM, long-term debt and due to related parties that meet the above definition (other than liabilities covered by other accounting standards, such as income tax payable) (see Notes 5, 7 and 14).

Financial Instruments - Classification and Measurement (upon adoption of PFRS 9)

Classification and Measurement upon the Adoption of PFRS 9

Classification of Financial Assets. Financial assets are classified in their entirety based on the contractual cash flows characteristics of the financial assets and the Parent Company's business model for managing the financial assets. The Parent Company classifies its financial assets into the following measurement categories:

- Financial assets measured at amortized cost;
- Financial assets measured at FVPL;
- Financial assets measured at FVOCI, where cumulative gains or losses previously recognized are reclassified to profit or loss;
- Financial assets measured at FVOCI, where cumulative gains or losses previously recognized are not reclassified to profit or loss.

Contractual Cash Flows Characteristics. If the financial asset is held within a business model whose objective is to hold assets to collect contractual cash flows or within a business model whose objective is achieved by both collecting contractual cash flows and selling financial assets, the Parent Company assesses whether the cash flows from the financial asset represent solely payments of principal and interest (SPPI) on the principal amount outstanding.

In making this assessment, the Parent Company determines whether the contractual cash flows are consistent with a basic lending arrangement, i.e., interest includes consideration only for the time value of money, credit risk and other basic lending risks and costs associated with holding the financial asset for a particular period of time. In addition, interest can include a profit margin that is consistent with a basic lending arrangement. The assessment as to whether the cash flows meet the test is made in the currency in which the financial asset is denominated. Any other contractual terms that introduce exposure to risks or volatility in the contractual cash flows that is unrelated to a basic lending arrangement, such as exposure to changes in equity prices or commodity prices, do not give rise to contractual cash flows that are solely payments of principal and interest on the principal amount outstanding.

Business Model. The Parent Company's business model is determined at a level that reflects how Parent Company of financial assets are managed together to achieve a particular business objective. The Parent Company's business model does not depend on management's intentions for an individual instrument.

The Parent Company's business model refers to how it manages its financial assets in order to generate cash flows. The Parent Company's business model determines whether cash flows will result from collecting contractual cash flows, selling financial assets or both. Relevant factors considered by the Parent Company in determining the business model for a group of financial assets include how the performance of the business model and the financial assets held within that business model are evaluated and reported to the Parent Company's key management personnel, the risks that affect the performance of the business model (and the financial assets held within that business model) and how these risks are managed and how managers of the business are compensated.

Financial Assets at Amortized Cost. A financial asset is measured at amortized cost if (a) it is held within a business model for which the objective is to hold financial assets in order to collect contractual cash flows and (b) the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

These financial assets are initially recognized at fair value plus directly attributable transaction costs and subsequently measured at amortized cost using the EIR method, less any impairment in value. Amortized cost is calculated by taking into account any discount or premium on acquisition and fees and costs that are an integral part of the EIR. The amortization is included in "Interest income" in the parent company statement of income and is calculated by applying the EIR to the gross carrying amount of the financial asset, except for (a) purchased or originated credit-impaired financial assets and (b) financial assets that have subsequently become credit-impaired, where, in both cases, the EIR is applied to the amortized cost of the financial asset. Losses arising from impairment are recognized in "Provision for bad debts" in the parent company statement of income.

As at December 31, 2018, the Parent Company has financial assets at amortized cost consisting of cash and cash equivalents, trade and other receivables, due from NPC/PSALM and due from related parties (see Notes 4, 5, 6 and 7)

Financial Assets at FVPL. Financial assets at FVPL are measured at FVPL unless these are measured at amortized cost or at FVOCI. Included in this classification are equity investments held for trading and debt instruments with contractual terms that do not represent solely payments of principal and interest. Financial assets held at FVPL are initially recognized at fair value, with transaction costs recognized in the statement of income as incurred. Subsequently, they are measured at fair value and any gains or losses are recognized in the statement of income.

Additionally, even if the asset meets the amortized cost or the FVOCI criteria, the Parent Company may choose at initial recognition to designate the financial asset at FVPL if doing so eliminates or significantly reduces a measurement or recognition inconsistency (an accounting mismatch) that would otherwise arise from measuring financial assets on a different basis.

Trading gains or losses are calculated based on the results arising from trading activities of the Parent Company, including all gains and losses from changes in fair value for financial assets and financial liabilities at FVPL, and the gains or losses from disposal of financial investments.

As at December 31, 2018, the Parent Company does not have equity instruments at FVPL.

Financial Assets at FVOCI. A financial asset is measured at FVOCI if (a) it is held within a business model for which the objective is achieved by both collecting contractual cash flows and selling financial assets and (b) its contractual terms give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding. These financial assets are initially recognized at fair value plus directly attributable transaction costs and subsequently measured at fair value. Gains and losses arising from changes in fair value are included in other comprehensive income within a separate component of equity. Impairment losses or reversals, interest income and foreign exchange gains and losses are recognized in profit and loss until the financial asset is derecognized. Upon derecognition, the cumulative gain or loss previously recognized in other comprehensive income is reclassified from equity to profit or loss. This reflects the gain or loss that would have been recognized in profit or loss upon derecognition if the financial asset had been measured at amortized cost. Impairment is measured based on the expected credit loss (ECL) model.

The Parent Company may also make an irrevocable election to measure at FVOCI on initial recognition investments in equity instruments that are neither held for trading nor contingent consideration recognized in a business combination in accordance with PFRS 3. Amounts recognized in OCI are not subsequently transferred to profit or loss. However, the Parent Company may transfer the cumulative gain or loss within equity. Dividends on such investments are recognized in profit or loss, unless the dividend clearly represents a recovery of part of the cost of the investment.

Dividends are recognized in profit or loss only when:

- the Parent Company's right to receive payment of the dividend is established;
- it is probable that the economic benefits associated with the dividend will flow to the Parent Company; and,
- the amount of the dividend can be measured reliably.

As at December 31, 2018, the Parent Company's financial assets at FVOCI includes proprietary golf club shares recorded as part of "Other noncurrent assets" (see Notes 13 and 24).

Classification of Financial Liabilities. Financial liabilities are measured at amortized cost, except for the following:

- Financial liabilities measured at fair value through profit or loss;
- Financial liabilities that arise when a transfer of a financial asset does not qualify for derecognition or when the Parent Company retains continuing involvement;
- Financial guarantee contracts;
- Commitments to provide a loan at a below-market interest rate; and,
- Contingent consideration recognized by an acquirer in accordance with PFRS 3.

A financial liability may be designated at fair value through profit or loss if it eliminates or significantly reduces a measurement or recognition inconsistency (an accounting mismatch) or:

- if a host contract contains one or more embedded derivatives; or,
- if a Parent Company of financial liabilities or financial assets and liabilities is managed and its
 performance evaluated on a fair value basis in accordance with a documented risk management
 or investment strategy.

Where a financial liability is designated at FVPL, the movement in fair value attributable to changes in the Parent Company's own credit quality is calculated by determining the changes in credit spreads above observable market interest rates and is presented separately in other comprehensive income.

The Parent Company's financial liabilities include trade and other payables, due to NPC/PSALM and due to related parties (see Notes 5, 7 and 14).

Impairment of Financial Assets (Prior to the Adoption of PFRS 9)

The Parent Company assesses at each reporting date whether there is any objective evidence that a financial asset or a group of financial assets is impaired. A financial asset or a group of financial assets is deemed to be impaired if, and only if, there is objective evidence of impairment as a result of one or more events that has occurred after the initial recognition of the assets (an incurred 'loss event') and that loss event (or events) has an impact on the estimated future cash flows of the financial asset or group of financial assets that can be readily estimated. Evidence of impairment may include indications that a borrower or a group of borrowers is experiencing significant financial difficulty, default or delinquency in interest or principal payments, the probability that they will enter bankruptcy or other financial reorganization and where observable data indicate that there is measurable decrease in the estimated future cash flows, such as changes in arrears or economic conditions that correlate with defaults.

Assets Carried at Amortized Cost. The Parent Company first assesses whether an objective evidence of impairment exists individually for financial assets that are individually significant. If it is determined that no objective evidence of impairment exists for an individually assessed financial asset, the asset, together with the other assets that are not individually significant and were thus not individually assessed for impairment, is included in a group of financial assets with similar credit risk characteristics and that group of financial assets is collectively assessed for impairment. Assets that are individually assessed for impairment and for which an impairment loss is or continues to be recognized are not included in a collective assessment of impairment.

If, in a subsequent period, the amount of the estimated impairment loss decreases because of an event occurring after the impairment was recognized, the previously recognized impairment loss is reduced by adjusting the allowance account. Any subsequent reversal of an impairment loss is recognized in the statement of comprehensive income, to the extent that the carrying value of the asset does not exceed its amortized cost at the reversal date.

AFS Financial Assets. If an AFS financial asset is impaired, an amount comprising the difference between its cost (net of any principal payment and amortization) and its current fair value, less any impairment loss previously recognized in the statement of comprehensive income, is transferred from the statement of changes in equity to the statement of comprehensive income. Reversals in respect of equity instruments classified as AFS are not recognized in the statement of comprehensive income. Reversals of impairment losses on debt instruments are reversed through profit or loss, if the increase in fair value of the instrument can be objectively related to an event occurring after the impairment loss was recognized in the statement of comprehensive income.

In the case of equity investments classified as AFS, impairment indicators would include a significant or prolonged decline in the fair value of the investments below its cost. Where there is evidence of impairment, the cumulative loss, measured as the difference between the acquisition cost and the current fair value, less any impairment loss on that financial asset previously recognized in the statement of comprehensive income. Impairment losses on equity investments are not reversed through profit or loss. Increases in fair value after impairment are recognized directly in the statement of changes in equity.

Impairment of Financial Assets (Upon the Adoption of PFRS 9)

Upon adoption of PFRS 9, the standard introduces the single, forward-looking "expected loss" impairment model, replacing the "incurred loss" impairment model under PAS 39.

The Parent Company recognizes ECL for the following financial assets that are not measured at FVPL:

- Debt instruments that are measured at amortized cost and FVOCI;
- Loan commitments; and,
- Financial guarantee contracts

No ECL is recognized on equity investments.

ECLs are measured in a way that reflects the following:

- an unbiased and probability-weighted amount that is determined by evaluating a range of possible outcomes;
- the time value of money; and,
- reasonable and supportable information that is available without undue cost or effort at the reporting date about past events, current conditions and forecasts of future economic conditions.

Financial assets migrate through the following three stages based on the change in credit quality since initial recognition:

- Stage 1: 12-month ECL. For credit exposures where there have not been significant increases
 in credit risk since initial recognition and that are not credit-impaired upon origination, the
 portion of lifetime ECLs that represent the ECLs that result from default events that are possible
 within the 12-months after the reporting date are recognized.
- Stage 2: Lifetime ECL not credit-impaired. For credit exposures where there have been
 significant increases in credit risk since initial recognition on an individual or collective basis
 but are not credit-impaired, lifetime ECLs representing the ECLs that result from all possible
 default events over the expected life of the financial asset are recognized.

Stage 3: Lifetime ECL - credit-impaired. Financial assets are credit-impaired when one or more
events that have a detrimental impact on the estimated future cash flows of those financial assets
have occurred. For these credit exposures, lifetime ECLs are recognized and interest revenue
is calculated by applying the credit-adjusted effective interest rate to the amortized cost of the
financial asset.

Loss allowances are recognized based on 12-month ECL for debt investment securities that are assessed to have low credit risk at the reporting date. A financial asset is considered to have low credit risk if:

- the financial instrument has a low risk of default;
- the borrower has a strong capacity to meet its contractual cash flow obligations in the near term;
 or,
- adverse changes in economic and business conditions in the longer term may, but will not
 necessarily, reduce the ability of the borrower to fulfil its contractual cash flow obligations.

The Parent Company considers a debt investment security to have low credit risk when its credit risk rating is equivalent to the globally understood definition of 'investment grade', or when the exposure is less than 30 days past due.

Determination of the Stage for Impairment. At each reporting date, the Parent Company assesses whether there has been a significant increase in credit risk for financial assets since initial recognition by comparing the risk of default occurring over the expected life between the reporting date and the date of initial recognition. The Parent Company considers reasonable and supportable information that is relevant and available without undue cost or effort for this purpose. This includes quantitative and qualitative information and forward-looking analysis.

An exposure will migrate through the ECL stages as asset quality deteriorates. If, in a subsequent period, asset quality improves and also reverses any previously assessed significant increase in credit risk since origination, then the loss allowance measurement reverts from lifetime ECL to 12-month ECL.

Simplified Approach. The simplified approach, where changes in credit risk are not tracked and loss allowances are measured at amounts equal to lifetime ECL, is applied to 'Trade and other receivables'. The Parent Company has established a provision matrix for commercial and industrial business segments that is based on historical credit loss experience, adjusted for forward-looking factors specific to the debtors and the economic environment.

The Parent Company considers a financial asset to be in default when internal or external information indicates that the Parent Company is unlikely to receive the outstanding contractual amounts in full before taking into account any credit enhancements held by the Parent Company.

Offsetting Financial Instruments

Financial assets and financial liabilities are offset and the net amount reported in the statement of financial position if, and only if, the Parent Company has a legally enforceable right to offset the recognized amounts and there is an intention to settle on a net basis, or to realize the asset and settle the liability simultaneously. The Parent Company assesses that it has a currently enforceable right of offset if the right is not contingent on a future event, and is legally enforceable in the normal course of business, event of default, and event of insolvency or bankruptcy of the Parent Company and all of the counterparties.

Derecognition of Financial Assets and Liabilities

Financial Assets. A financial asset (or, where applicable, a part of a financial asset or part of a group of similar financial assets) is derecognized where:

- · the rights to receive cash flows from the asset have expired;
- the Parent Company retains the right to receive cash flows from the asset, but has assumed an
 obligation to pay them in full without material delay to a third party under a 'pass-through'
 arrangement; or,
- the Parent Company has transferred its rights to receive cash flows from the asset and either (a)
 has transferred substantially all the risks and rewards of the asset, or (b) has neither transferred
 nor retained substantially all the risks and rewards of the asset but has transferred control of the
 asset.

Financial Liabilities. A financial liability is derecognized when the obligation under the liability is discharged or cancelled or has expired.

Fair Value Measurement

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value measurement is based on the presumption that the transaction to sell the asset or transfer the liability takes place either:

- In the principal market for the asset or liability; or,
- In the absence of a principal market, in the most advantageous market for the asset or liability.

The principal or the most advantageous market must be accessible to the Parent Company.

The fair value of an asset or a liability is measured using the assumptions that market participants would use when pricing the asset or liability, assuming that market participants act in their economic best interest.

A fair value measurement of a nonfinancial asset takes into account a market participant's ability to generate economic benefits by using the asset in its highest and best use or by selling it to another market participant that would use the asset in its highest and best use.

The Company uses valuation techniques that are appropriate in the circumstances and for which sufficient data are available to measure fair value, maximizing the use of relevant observable inputs and minimizing the use of unobservable inputs.

All assets and liabilities for which fair value is measured or disclosed in the company financial statements are categorized within the fair value hierarchy, described as follows, based on the lowest level input that is significant to the fair value measurement as a whole:

- Level 1 Quoted (unadjusted) market prices in active markets for identical assets or liabilities;
- Level 2 Valuation techniques for which the lowest level input that is significant to the fair value measurement is directly or indirectly observable; and,
- Level 3 Valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable.

For assets and liabilities that are recognized in the parent company statements of financial position on a recurring basis, the Parent Company determines whether transfers have occurred between Levels in the hierarchy by re-assessing categorization (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of each reporting period.

For the purpose of fair value disclosures, the Parent Company has determined classes of assets and liabilities on the basis of the nature, characteristics and risks of the asset or liability and the level of the fair value hierarchy as explained above.

Materials and Supplies

Materials and supplies, which consist of spare parts, fuel and consumables used in the operation, repairs and maintenance of the property, plant and equipment, are stated at the lower of cost and net realizable value (NRV). Cost is determined using the moving average method. NRV is the current replacement cost in the ordinary course of business.

Value-added Tax (VAT)

Revenue, expenses, and assets are recognized net of the amount of VAT, if applicable.

When VAT from sales of goods and/or services (output VAT) exceeds VAT passed on from purchases of goods or services (input VAT), the excess is recognized as payable in the statement of financial position. When VAT passed on from purchases of goods or services (input VAT) exceeds VAT from sales of goods and/or services (output VAT), the excess is recognized as an asset in the statement of financial position to the extent of the recoverable amount.

Noncurrent Assets Held for Sale

The Parent Company classifies noncurrent assets and disposal groups as held for sale if their carrying amounts will be recovered principally through a sale transaction rather than through continuing use. Noncurrent assets and disposal groups classified as held for sale are measured at the lower of their carrying amount and fair value less costs to sell. Costs to sell are the incremental costs directly attributable to the disposal of an asset (disposal group), excluding finance costs and income tax expense, if any. Liabilities directly associated with noncurrent asset held for sale are classified and presented separately.

The criteria for held for sale classification is regarded as met only when the sale is highly probable and the asset or disposal group is available for immediate sale in its present condition. Actions required to complete the sale should indicate that it is unlikely that significant changes to the sale will be made or that the decision to sell will be withdrawn. Management must be committed to the plan to sell the asset and the sale expected to be completed within one year from the date of the classification.

Property, plant and equipment and intangible assets are not depreciated or amortized once classified as held for sale.

Investments in Associates and Subsidiaries

The Parent Company's investments in associates and subsidiaries are accounted for at cost less any impairment loss, in accordance with PAS 27, Separate Financial Statements. An associate is an entity in which the Parent Company has significant influence and which is neither a subsidiary nor a joint venture. A subsidiary is an entity that is controlled by the Parent Company.

Property, Plant and Equipment

Property, plant and equipment are stated at cost, excluding the costs of day-to-day servicing, less accumulated depreciation and any allowance for impairment losses.

The initial cost of property, plant and equipment comprises its purchase price, including import duties and non-refundable purchase taxes, after deducting trade discounts and rebates and any directly attributable cost of bringing the asset to its working condition and location for its intended use. Such cost includes the cost of replacing part of such property, plant and equipment and borrowing costs for long term construction projects when the recognition criteria are met. Cost also includes asset retirement obligation specifically for property, plant and equipment installed/constructed on the leased properties.

Expenditures incurred after the property, plant and equipment have been put into operations, such as repairs and maintenance, are normally charged to income in the period when the costs are incurred. In situations where it can be clearly demonstrated that the expenditures have resulted in an increase in the future economic benefits expected to be obtained from the use of an item of property, plant and equipment beyond its originally assessed standard of performance, the expenditures are capitalized as additional costs of property, plant and equipment.

The carrying amount of the replaced part, regardless of whether the replaced part had been depreciated separately, is derecognized if an entity recognizes in the carrying amount of an item of property, plant and equipment the cost of a replacement for part of the item. If it is not practicable for an entity to determine the carrying amount of the replaced part, it may use the cost of the replacement as an indication of what the cost of the replaced part was at the time it was acquired or constructed. When each major inspection is performed, its cost is recognized in the carrying amount of the item of property, plant and equipment as a replacement if the recognition criteria are satisfied.

Depreciation of property, plant and equipment commences once the assets are available for use and is computed on a straight-line basis over the estimated useful lives of the assets or lease term, whichever is shorter, as follows:

Buildings, plant machinery and equipment	2-15 years
Motor vehicles	2-12 years
Furniture and office equipment	2-12 years
Partitions and air conditioners	2-12 years

The remaining useful lives and the depreciation method are reviewed periodically to ensure that the periods and method of depreciation are consistent with the expected pattern of consumption of future economic benefits from items of property, plant and equipment.

When assets are retired or otherwise disposed of, the cost and the related accumulated depreciation and any allowance for impairment losses are removed from the accounts and any resulting gain or loss is credited to or charged to current operations.

Construction in progress represents assets under construction and is stated at cost. This includes cost of construction, equipment and other direct costs. Construction in progress is not depreciated until such time as the relevant assets are completed and available for operational use.

Asset Retirement Obligation (ARO)

The Parent Company has a contractual obligation under the Land Lease Agreement (LLA) (see Note 25) with PSALM (the Lessor) pursuant to the acquisition of the LBGTs to dismantle and remove all movable and immovable improvements directed to be removed by the Lessor, to clean and free the leased premises from all environmental waste, hazardous substances and hazardous materials, including those resulting from any dismantling, to repair any damage caused to the leased premises, and to restore the leased premises to the condition it was found at the acquisition date to the full satisfaction of the Lessor, subject to ordinary wear and tear, within 180 days from the termination of the lease agreement or expiration of the lease term.

The ARO recognized represents the best estimate of the expenditures required to dismantle installed assets and restore the leased premises to their original condition at the end of the lease term. Such cost estimates are discounted using a pre-tax rate that reflects the current market assessment of the time value of money and the risks specific to the liability. The Parent Company recognized the fair value of the liability for these obligations and capitalizes the present value of these costs as part of the property, plant and equipment account, which are depreciated on a straight-line basis over the remaining useful lives of the related property, plant and equipment. Each year, the ARO is increased to reflect the accretion of discount and to accrue an estimate for the effects of inflation, with the charges being recognized under "Interest expense" in the parent company statement of comprehensive income.

While it is believed that the assumptions used in the estimation of such costs are reasonable, significant changes in these assumptions may materially affect the recorded expense or obligations in future years. Changes in the measurement of an existing decommissioning, restoration and similar liability that result from changes in the estimated timing or amount of the outflow of resources embodying economic benefits required to settle the obligation, or a change in the discount rate, shall be accounted for in accordance with the following under the cost model of accounting for the related asset subject to (a) changes in the liability shall be added to, or deducted from, the cost of the related asset in the current period, (b) the amount deducted from the cost of the asset shall not exceed its carrying amount, the excess shall be recognized immediately in the parent company statement of comprehensive income, and (c) if the adjustment results in an addition to the cost of an asset, the Parent Company shall consider whether this is an indication that the new carrying amount of the asset may not be fully recoverable. If it is such an indication, the Parent Company shall test the asset and account for any impairment loss in accordance with PAS 36.

The adjusted depreciable amount of the asset, after adjustment for changes in ARO, is depreciated over its useful life. Once the related asset has reached the end of its useful life, all subsequent changes in the ARO shall be recognized in profit or loss as they occur.

Impairment of Nonfinancial Assets

The Parent Company assesses at each reporting date whether there is an indication that an asset may be impaired. If any such indication exists, or when annual impairment testing for an asset is required, the Parent Company makes an estimate of the asset's recoverable amount. An asset's recoverable amount is the higher of an asset's or cash-generating unit's fair value less costs to sell and its value in use and is determined for an individual asset, unless the asset does not generate cash inflows that are largely independent of those from other assets or group of assets. Where the carrying amount of an asset exceeds its recoverable amount, the asset is considered impaired and is written down to its recoverable amount. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. Impairment losses of continuing operations are recognized in the parent company statement of comprehensive income in those expense categories consistent with the function of the impaired asset.

An assessment is made at each reporting date as to whether there is any indication that previously recognized impairment losses may no longer exist or may have decreased. If such indication exists, the recoverable amount is estimated. A previously recognized impairment loss is reversed only if there has been a change in the estimates used to determine the asset's recoverable amount since the last impairment loss was recognized. If that is the case, the carrying amount of the asset is increased to its recoverable amount. That increased amount cannot exceed the carrying amount that would have been determined, net of accumulated depreciation and amortization, had no impairment loss been recognized for the asset in prior years. Such reversal is recognized in the parent company statement of comprehensive income unless the asset is carried at revalued amount, in which case the reversal is treated as a revaluation increase. After such a reversal, the depreciation charge is adjusted in future periods to allocate the asset's revised carrying amount, less any residual value, on a systematic basis over its remaining useful life.

Equity

Capital Stock. Capital stock is recognized at par value for all issued shares.

Additional Paid-in Capital. Consideration received in excess of par value are recognized as additional paid-in capital, net of incremental costs that are directly attributable of the issuance of new shares.

Treasury Shares. These own equity instruments which are reacquired are recognized at cost and deducted from equity. No gain or loss is recognized in the parent company statement of comprehensive income on the purchase, sale, issue or cancellation of the Parent Company's own equity instruments.

Retained Earnings. Retained earnings include cumulative balance of periodic net income or loss, dividend contributions, prior period adjustments, effect of changes in accounting policy and other capital adjustments.

Revenue Recognition

Prior to the adoption of PFRS 15, revenue is recognized to the extent that it is probable that the economic benefits associated with the transaction will flow to the Parent Company and the amount of revenue can be reliably measured. Revenue is measured at the fair value of the consideration received, excluding discounts, rebates, sales taxes or duty.

Upon adoption of PFRS 15, revenue from contracts with customers is recognized when control of the goods or services are transferred to the customer at an amount that reflects the consideration to which the Parent Company expects to be entitled in exchange for those goods or services, excluding amounts collected on behalf of third parties.

Revenue is recognized when the Parent Company satisfies a performance obligation by transferring a promised good or service to the customer, which is when the customer obtains control of the good or service. A performance obligation may be satisfied at a point in time or over time. The amount of revenue recognized is the amount allocated to the satisfied performance obligation.

The Parent Company has concluded that it is the principal in its revenue arrangements because it controls the goods or services before these goods or services are transferred to the customer. The following specific recognition criteria must also be met before revenue is recognized:

Operating Fees

Revenue consists of: (i) fees received from National Grid Corporation of the Philippines for rendering ancillary services; and (ii) energy fees for electricity sold to the Wholesale Electricity Spot Market (WESM).

Under PAS 18, revenue from power generation is recognized in the period actual capacity is generated.

Under PFRS 15, the Parent Company has concluded that revenue should be recognized over time since the customer simultaneously receives and consumes the benefit as the seller supplies power. For power generation where capacity and energy dispatched are separately identified, these two obligations are to be combined as one performance obligation since these are not distinct within the context of the contract as the buyer cannot benefit from the contracted capacity alone without the corresponding energy and the buyer cannot obtain energy without contracting a capacity. The combined performance obligation qualifies as a series of distinct goods or services that are substantially the same and have the same pattern of transfer. In contracts with fixed capacity payments which are determined at contract inception, the fixed capacity payments for the entire contract period is determined at day 1 and is recognized over time.

Some contracts with customers provide unspecified quantity of energy, and includes provisional Energy Regulatory Commission (ERC) rates. Under PFRS 15, the variable consideration is estimated at contract inception and constrained until the associated uncertainty is subsequently resolved. The application of constraint on variable consideration resulted in the same revenue recognition under PAS 18.

Other Income. Other income is recognized as earned when the related services or performance obligations are rendered or satisfied under PAS 18 and PFRS 15. In 2018 and 2017, this account consists mainly of incidental income derived from operating and preserving the NPPC after November 28, 2016 (see Notes 3 and 26) and service income not directly related to generation and distribution of electricity. The account also includes net gains/proceeds from disposal of assets, scraps and used oil.

Interest Income. Interest income is recognized as interest accrues taking into account the effective yield of the asset.

Dividend Income. Dividend income from investments in associates and subsidiaries is recognized when the Parent Company's right to receive payment is established.

Cost and Expense Recognition

Cost and expenses are recognized in the parent company statement of comprehensive income when incurred.

Borrowing Costs

Borrowing costs are capitalized if they are directly attributable to the acquisition or construction of a qualifying asset, specifically major capital projects; otherwise they are recognized as an expense.

Capitalization of borrowing costs commences when the activities to prepare the asset are in progress and expenditures and borrowing costs are being incurred. Borrowing costs are capitalized until the assets are substantially ready for their intended use. If the carrying amount of the asset exceeds its recoverable amount, an impairment loss is recorded.

Leases

The determination of whether an arrangement is, or contains a lease, is based on the substance of the arrangement at the inception date and requires an assessment of whether the fulfilment of the arrangement is dependent on the use of a specific asset or assets and the arrangement conveys a right to use the asset. A reassessment is made after inception of the lease only if one of the following applies:

- a. there is a change in contractual terms, other than a renewal or extension of the arrangement;
- a renewal option is exercised or extension granted, unless that term of the renewal or extension was initially included in the lease term;
- c. there is a change in the determination of whether fulfilment is dependent on a specific asset; or
- there is a substantial change to the asset.

Where a reassessment is made, lease accounting shall commence or cease from the date when the change in circumstances gives rise to the reassessment for scenarios (a), (c) or (d) above, and at the date of renewal or extension period for scenario (b).

Leases where the lessor retains substantially all the risks and benefits of ownership of the assets are classified as operating leases. Operating lease payments on non-cancellable leases are directly charged against current operations on a straight-line basis over the lease term. Operating lease payments on cancellable leases are directly charged against current operations based on the terms of the lease.

Pension Expense

The Parent Company has a funded, noncontributory defined pension plan covering all regular and permanent employees. The cost of providing benefits is determined using the projected unit credit method. This method considers each period of service as giving rise to an additional unit of benefit entitlement and measures each unit separately to build up the final obligation.

The net defined benefit liability or asset is the aggregate of the present value of the defined benefit obligation at the end of the reporting period reduced by the fair value of plan assets, adjusted for any effect of limiting a net defined benefit asset to the asset ceiling. The asset ceiling is the present value of any economic benefits available in the form of refunds from the plan or reductions in future contributions to the plan.

Defined benefit costs comprise the following:

- Service cost;
- Net interest on the net defined benefit liability; and
- Remeasurements of net defined benefit liability.

Service costs which include current service costs, past service costs and gains or losses on non-routine settlements are recognized as expense in the parent company statement of comprehensive income. Past service costs are recognized when plan amendment or curtailment occurs. These amounts are calculated periodically by independent qualified actuaries.

Net interest on the net defined benefit liability or asset is the change during the period in the net defined benefit liability that arises from the passage of time which is determined by applying the discount rate based on government bonds to the net defined benefit liability or asset. Net interest on the net defined benefit liability is recognized as expense or income in the parent company statement of comprehensive income.

Remeasurements comprising actuarial gains and losses, return on plan assets and any change in the effect of the asset ceiling (excluding net interest on defined benefit liability) are recognized immediately in other comprehensive income in the period in which they arise. Remeasurements are not reclassified to parent company statement of comprehensive income in subsequent periods.

Plan assets are assets that are held by a long-term employee benefit fund or qualifying insurance policies. Plan assets are not available to the creditors of the Parent Company, nor can they be paid directly to the Parent Company. Fair value of plan assets is based on market price information. When no market price is available, the fair value of plan assets is estimated by discounting expected future cash flows using a discount rate that reflects both the risk associated with the plan assets and the maturity or expected disposal date of those assets (or, if they have no maturity, the expected period until the settlement of the related obligations). If the fair value of the plan assets is higher than the present value of the defined benefit obligation, the measurement of the resulting defined benefit asset is limited to the present value of economic benefits available in the form of refunds from the plan or reductions in future contributions to the plan.

Income Tax

Current Income Tax. Current income tax assets and liabilities for the current and prior periods are measured at the amount expected to be recovered from or paid to the taxation authorities. The tax rates and tax laws used to compute the amount are those that are enacted or substantively enacted as at the reporting date.

Deferred Income Tax. Deferred income tax is provided, using the balance sheet liability method, on temporary differences at the reporting date between the tax bases of assets and liabilities and their carrying amounts for financial reporting purposes.

Deferred income tax liabilities are recognized for all taxable temporary differences, except:

- where the deferred income tax liability arises from the initial recognition of goodwill or of an
 asset or liability in a transaction that is not a business combination and, at the time of the
 transaction, affects neither the accounting profit nor taxable profit or loss; and
- in respect of taxable temporary differences associated with investments in subsidiaries and associates, where the timing of the reversal of the temporary differences can be controlled and it is probable that the temporary differences will not reverse in the foreseeable future.

Deferred income tax assets are recognized for all deductible temporary differences to the extent that it is probable that taxable profit will be available against which the deductible temporary differences can be utilized except:

- where the deferred income tax asset relating to the deductible temporary difference arises from
 the initial recognition of an asset or liability in a transaction that is not a business combination
 and, at the time of the transaction, affects neither the accounting profit nor taxable profit or loss;
 and,
- in respect of deductible temporary differences associated with investments in subsidiaries and associates. Deferred income tax assets are recognized only to the extent that it is probable that the temporary differences will reverse in the foreseeable future and taxable profit will be available against which the temporary differences can be utilized.

The carrying amount of deferred income tax assets is reviewed at each reporting date and reduced to the extent that it is no longer probable that sufficient taxable profit will be available to allow all or part of the deferred income tax assets to be utilized.

Deferred income tax assets and liabilities are measured at the tax rates that are expected to apply to the period when the asset is realized or the liability is settled, based on tax rates (and tax laws) that have been enacted or substantively enacted as at the reporting date.

Related Party Transactions

Transactions with related parties are accounted for based on the nature and substance of the agreement, and financial effects are included in the appropriate asset, liability, income and expense accounts.

Provisions

Provisions are recognized when the Parent Company has a present obligation (legal or constructive) as a result of a past event, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation, and a reliable estimate can be made of the amount of the obligation. Where the Parent Company expects some or all of a provision to be reimbursed, for example under an insurance contract, the reimbursement is recognized as a separate asset but only when the reimbursement is virtually certain. If the effect of the time value of money is material, provisions are determined by discounting the expected future cash flows at a pre-tax rate that reflects current market assessment of the time value of money and, where appropriate, the risks specific to the liability. Where discounting is used, the increase in the provision due to the passage of time is recognized as interest expense.

Foreign Currency-Denominated Transactions

The Parent Company's financial statements are presented in Philippine Peso, the Parent Company's functional currency. Transactions in foreign currencies are initially recorded in the functional currency rate prevailing at the date of the transaction.

Monetary assets and liabilities denominated in foreign currencies are restated at the functional currency rate of exchange ruling at the reporting date. All differences are directly charged against or credited to current operations.

Nonmonetary items that are measured in terms of historical cost in a foreign currency are translated using the exchange rates as at the dates of the initial transactions. Nonmonetary items measured at fair value in a foreign currency are translated using the exchange rates at the date when the fair value was determined.

Earnings per Share

Basic earnings per common share is determined by dividing net income by the weighted average number of common shares outstanding, after retroactive adjustment for any stock dividend and stock splits declared during the year.

Diluted earnings per common share is calculated by dividing the net income for the year attributable to the ordinary equity holders of the Parent Company by the weighted average number of common shares outstanding during the year plus the weighted average number of ordinary shares that would be issued for any outstanding common stock equivalents.

Segment Reporting

For management purposes, the Parent Company is organized into business units based on their services and has only one single operating segment as of December 31, 2018 and 2017. No operating segments have been aggregated to form the Parent Company's single operating segment. Management monitors the operating results of its business units separately for the purpose of making decisions about resource allocation and performance assessment. Segment performance is evaluated based on operating profit or loss and is measured consistently with operating profit or loss in the parent company financial statements. However, financing and income taxes are not allocated to operating segments.

Contingencies

Contingent liabilities are not recognized in the Parent Company financial statements. These are disclosed unless the possibility of an outflow of resources embodying economic benefits is remote. Contingent assets are likewise not recognized in the parent company financial statements but are disclosed when an inflow of economic benefits is probable.

Events After the Reporting Period

Post year-end events that provide additional information about the Parent Company's position at the reporting period (adjusting events) are reflected in the parent company financial statements. Post year-end events that are not adjusting events are disclosed in the notes to the parent company financial statements when material.

3. Significant Accounting Judgments and Estimates

The Parent Company's financial statements, prepared in compliance with PFRSs, require the Parent Company to make judgments and estimates that affect amounts reported in the parent company financial statements and related notes. In preparing these financial statements, the Parent Company made its best judgments and estimates of certain amounts, giving due consideration to materiality. The Parent Company believes that the following represent a summary of these significant accounting judgments and estimates and the related impact and associated risks in the parent company financial statements.

Judgments

In the process of applying the Parent Company's accounting policies, management has made judgments, apart from those involving estimations, which have the most significant effect on the amounts recognized in the parent company's financial statements.

Revenue Recognition upon adoption of PFRS 15. The Parent Company recognizes revenue when it satisfies an identified performance obligation by transferring a promised good or service to a customer. A good or service is considered to be transferred when the customer obtains control. The Parent Company determines, at contract inception, whether it will transfer control of a promised good or service over time. If the Parent Company does not satisfy a performance obligation over time, the performance obligation is satisfied at a point in time.

The Parent Company revenue from power generation and are to be recognized over time, since customers simultaneously receive and consume the benefits as the Parent Company supplies power.

Significant judgments in revenue recognition under PFRS 15 are as follows:

• Identifying Performance Obligations. The Parent Company identifies performance obligations by considering whether the promised goods or services in the contract are distinct goods or services. A good or service is distinct when the customer can benefit from the good or service on its own or together with other resources that are readily available to the customer and the Parent Company's promise to transfer the good or service to the customer is separately identifiable from the other promises in the contract.

The Parent Company assesses performance obligations as a series of distinct goods and services that are substantially the same and have the same pattern of transfer if i) each distinct good or services in the series are transferred over time and ii) the same method of progress will be used (i.e., units of delivery) to measure the entity's progress towards complete satisfaction of the performance obligation.

For power generation and ancillary services where capacity and energy dispatched are separately identified, these two obligations are to be combined as one performance obligation since these are not distinct within the context of the contract as the buyer cannot benefit from the contracted capacity alone without the corresponding energy and the buyer cannot obtain energy without contracting a capacity.

The combined performance obligation qualifies as a series of distinct goods or services that are substantially the same and have the same pattern of transfer since the delivery of energy every month are distinct services which are all recognized over time and have the same measure of progress.

• Identifying Methods for Measuring Progress of Revenue Recognized Over Time. The Parent Company determines the appropriate method of measuring progress which is either through the use of input or output methods. Input method recognizes revenue on the basis of the entity's efforts or inputs to the satisfaction of a performance obligation while output method recognizes revenue on the basis of direct measurements of the value to the customer of the goods or services transferred to date.

For power generation and ancillary services, the Parent Company determined that the output method is the best method in measuring progress since actual electricity is supplied to customers. The Parent Company recognizes revenue based on:

- For the variable energy payment, actual kilowatt hours consumed which are billed on a monthly basis.
- For fixed capacity payments, the Parent Company allocates the transaction price on a straight-line basis over the contract term. The allocated fixed payments are also billed on a monthly basis.
- Determining Method to Estimate Variable Consideration and Assessing the Constraint. The Parent Company includes some or all the amounts of variable consideration estimated but only to the extent that it is highly probable that a significant reversal in the amount of cumulative revenue recognized will not occur when the uncertainty associated with the variable consideration is subsequently resolved. The Parent Company considers both the likelihood and magnitude of the revenue reversal in evaluating the extent of variable consideration the Parent Company will subject to constraint. Factors such as i) highly susceptibility to factors outside the Parent Company's influence, ii) timing of resolution of the uncertainty, and iii) having a large number and broad range of possible considerations amount are considered.

Some contracts with customers provide unspecified quantity of energy, provisional ERC rates, and prompt payment discounts that give rise to variable consideration. In estimating the variable consideration, the Parent Company applies the expected value method in estimating the variable consideration given the large number of customer contracts that have similar characteristics and the range of possible outcomes.

Before including any amount of variable consideration in the transaction price, the Parent Company considers whether the amount of variable consideration is constrained. The Parent Company determined that the estimates of variable consideration are to be fully constrained based on its historical experience (i.e., prompt payment discounts), the range of possible outcomes (i.e., unspecified quantity of energy), and the unpredictability of other factors outside the Parent Company's influence (i.e., provisional ERC rates).

* Allocation of variable consideration. Variable consideration may be attributable to the entire contract or to a specific part of the contract. For power generation, power and ancillary services revenue streams which are considered as series of distinct goods or services that are substantially the same and have the same pattern of transfer, the Parent Company allocates the variable amount that is no longer subject to constraint to the satisfied portion (i.e., month) which forms part of the single performance obligation, and forms part of the monthly billing of the Parent Company.

Assessment of Classification of Noncurrent Asset Held for Sale. On May 28, 2018, the BOD announced its decision to sell the LBGT and was consequently classified as a disposal group held for sale. As of December 31, 2018, the Parent Company is actively searching for potential buyers of the disposal group. The Parent Company considered the disposal group to meet the criteria to be classified as held for sale as of December 31, 2018 for the following reasons:

- The disposal group is available for immediate sale and can be sold to the buyer in its current condition.
- The actions to complete the sale were initiated and expected to be completed within one year from the date of initial classification.
- There is an active plan to locate potential buyers.

Determining the Classification and Valuation of Assets and Liabilities and Measurement of Revenues, Costs and Expenses Related to the Acquisition of the 153.1 MW Naga Power Plant Complex (NPPC). The legal developments as discussed in Note 26 required the Parent Company to exercise judgment relating to the classification and valuation of assets and liabilities, and measurement of revenues, costs and expenses in relation to the NPPC acquisition. Since the Supreme Court (SC) decisions did not specifically rule how the nullified transaction will be treated and settled between the Parent Company and PSALM, management, in consultation with external legal counsels, exercised its due judgment on how these decisions will be implemented. The Parent Company assessed that it is appropriate to recognize a receivable as of December 31, 2017 and exercised judgments regarding the amount of claim to be recognized and the expected timing of when that claim will be collected. Thus, the Parent Company derecognized in 2015, the NPPC from property, plant and equipment and the prepaid rent, and recognized a noncurrent receivable from PSALM of P1.143 billion, which is equivalent to the purchase price of the NPPC and land lease rental paid by the Parent Company to PSALM in 2014.

After the Entry of Judgment on November 28, 2016, the date when the SC decisions became final and executory, the Parent Company, in exercising its legal right of retention, continued operating the NPPC as the best way to preserve it pending turnover of the NPPC and settlement of possible claims and counterclaims between the Parent Company and PSALM. The Parent Company assessed that the income from NPPC is a necessary consequence of its operation as the best way to preserve it in preparation for the eventual turnover to PSALM. The income from operation of the NPPC (net of directly related costs and expenses) amounted to ₱76.1 million and ₱121.5 million in 2018 and 2017, respectively, and were recognized as part "Other income" in the parent company statement of comprehensive income. The income in 2016 from the operation of NPPC after November 28, 2016 was not material.

Pursuant to the Memorandum of Agreement (MOA) subsequently made and entered into between PSALM and the Parent Company dated July 9, 2018 to implement the SC decision, a Joint Certificate of Turnover was signed by the parties on July 13, 2018 for the return of the NPPC to PSALM, return of the bid/purchase price of NPPC to SPC and settlement of fuel payable as provided in the MOA.

Estimates and Assumptions

Estimating Allowance for Impairment Losses (prior to adoption of PFRS 9). The Parent Company maintains allowance for impairment losses at a level that management considers adequate to provide for potential uncollectability of receivables. The Parent Company evaluates specific accounts where the Parent Company has information that certain customer or third parties are unable to meet its financial obligations. Also included in the assessment are the dividends receivable, due from NPC/PSALM, due from related parties and noncurrent receivable (included under "Other noncurrent assets"). Factors, such as the Parent Company's length of relationship with the customers or other parties and the customers' or other parties' current credit status, are considered to ascertain the amount of reserves that will be recorded in the trade and other receivables, dividends receivable, due from NPC/PSALM, due from related parties and noncurrent receivable (included under "Other noncurrent assets") in the parent company statement of financial position. These reserves are re-evaluated and adjusted as additional information is received.

In addition to specific allowance against individually significant loans and receivables, the Parent Company also makes a collective assessment of allowance against exposures which, although not specifically identified as requiring a specific allowance, have a greater risk of default than when originally granted.

Allowance for impairment amounted to \$\mathbb{P}3.8\$ million and \$\mathbb{P}1.4\$ million as of December 31, 2018 and 2017, respectively. The carrying value of these receivables, net of allowance for impairment, amounted to \$\mathbb{P}411.3\$ million and \$\mathbb{P}1,255.3\$ million of December 31, 2018 and 2017, respectively (see Notes 5, 6, 7 and 13).

Estimating Expected Credit Losses on Trade and Other Receivables, Due from NPC/PSALM and Due from Related Parties using Simplified Approach (upon adoption of PFRS 9). The Parent Company uses the provision matrix to calculate ECLs for these receivables. The Parent Company calculates provision rates based on days past due for a group of various customer or debtor segments that have similar loss patterns (i.e., customer type).

The provision matrix is initially based on the Parent Company's historical observed loss rates. The Parent Company will calibrate the matrix to adjust the historical credit loss experience with forward-looking information. For instance, if forecast economic conditions (i.e., inflation rates) are expected to increase over the next year which can lead to an increased number of defaults, the historical loss rates are adjusted. At every reporting date, the historical observed loss rates are updated and changes in the forward-looking estimates are analyzed.

The assessment of the correlation between historical observed loss rates, forecast economic conditions and ECLs is a significant estimate which involves qualitative and quantitative thresholds in place. The amount of ECLs is sensitive to changes in circumstances and of forecast economic conditions. The Parent Company's historical credit loss experience and forecast of economic conditions may also not be representative of customer's actual default in the future.

The Parent Company incorporates forward-looking information into both its assessment of whether the credit risk of an instrument has increased significantly since its initial recognition and its measurement of ECL.

The Parent Company has identified and documented key drivers of credit risk and credit losses of each portfolio of financial instruments and, using an analysis of historical data, has estimated relationships between macro-economic variables and credit risk and credit losses.

Predicted relationship between the key indicators and default and loss rates on various portfolios of financial assets have been developed based on analyzing historical data over the past 3 years. The methodologies and assumptions including any forecasts of future economic conditions are reviewed regularly.

The Parent Company has not identified any uncertain event that it has assessed to be relevant to the risk of default occurring but where it is not able to estimate the impact on ECL due to lack of reasonable and supportable information.

An increase in the Parent Company's allowance for expected credit losses of trade and other receivables, due from NPC/PSALM and due from related parties will increase the Parent Company's recorded expenses and decrease current assets. As of December 31, 2018, allowance for expected credit losses amounted to P3.8 million (see Notes 5, 6 and 7). These receivables, net of allowance for expected credit losses, amounted to P411.3 million as of December 31, 2018 (see Note 6).

Estimating Allowance for Materials and Supplies Obsolescence. The Parent Company provides allowance for losses related to materials and supplies whenever the value of these materials and supplies becomes lower than cost due to damage, physical deterioration or obsolescence. The amounts and timing of the recorded expenses for any period would differ if the Parent Company made different judgments or utilized different estimates. An increase in allowance for losses would increase recorded expenses and decrease current assets.

Allowance for losses amounted to nil and \$85.5 million as of December 31, 2018 and 2017, respectively (see Note 8). The carrying value of the materials and supplies, net of allowance for losses, amounted to \$85.5 million and \$8318.5 million as of December 31, 2018 and 2017, respectively (see Note 8).

Estimating Useful Lives of Property, Plant and Equipment. The Parent Company estimates the useful lives of property, plant and equipment based on the period over which the assets are expected to be available for use or lease term, whichever is shorter. The estimated useful lives of property, plant and equipment are reviewed periodically and are updated if expectations differ from previous estimates due to physical wear and tear, technical or commercial obsolescence and legal or other limits on the use of the assets. In addition, the estimation of the useful lives of property, plant and equipment is based on collective assessment of internal technical evaluation and experience with similar assets. However, it is possible that future results of operations could be materially affected by changes in estimates brought about by changes in factors mentioned above. The amounts and timing of recording expenses for any period would be affected by changes in these factors and circumstances.

The Parent Company recognized depreciation expense amounting to P12.4 million, P1.2 million and P1.0 million in 2018, 2017 and 2016, respectively (see Note 21). As of December 31, 2018 and 2017, the aggregate net book values of property, plant and equipment amounted to P411.5 million and P414.0 million, respectively (see Note 12).

Estimating Impairment of Property, Plant and Equipment. Property, plant and equipment are reviewed and tested whenever there is an indication of impairment and are reassessed at least each reporting date. Factors such as significant underperformance of an asset relative to expected historical or projected future operating results, significant changes in the manner of use of the acquired assets, or significant negative industry or economic trends are considered by the Parent Company in assessing whether there is an indication that an asset's carrying amount may exceed its recoverable amount.

The Parent Company recognized impairment loss amounting to P14.3 million and P5.7 million in 2018 and 2016, and nil in 2017. As of December 31, 2018 and 2017, the aggregate net book values of property, plant and equipment amounted to P411.5 million and P414.0 million, respectively (see Note 12).

Estimating Impairment of Investments in Associates and Investments in Subsidiaries. The Parent Company assesses whether there are any indicators of impairment on investments in associates and subsidiaries at each reporting date. Investments in associates and subsidiaries are tested for impairment whenever events or changes in circumstances indicate that the carrying amount of the asset may not be recoverable. The recoverable amount of investments in associates and investments subsidiaries is based on fair value less cost to sell. Fair value less cost to sell is determined to be the amount obtainable from the sale of the underlying net assets of the associate or subsidiary. The carrying amounts of investments in associates as of December 31, 2018 and 2017 amounted to P2,852.5 million (see Note 10). The carrying amounts of investments in subsidiaries as of December 31, 2018 and 2017 amounted to P341.2 million (see Note 11). Based on management's assessment, the Parent Company's investments in associates and investments in subsidiaries are fairly stated, thus no impairment loss was recognized in 2018, 2017 and 2016.

Estimating Asset Retirement Obligation. The Parent Company has a contractual obligation under the LLA with PSALM to dismantle installed assets and restore the leased premises to their original condition at the end of the lease term (see Notes 15 and 25). These estimated costs of dismantlement and restoration assume third party estimates. Such estimate was projected using an average inflation rate of 3.49% and was discounted using a rate of 3.89% representing the risk-free rate for the remaining years of the LLA.

The amount and timing of recorded expenses for any period would differ if different assumptions are used. An increase in computed ARO would increase the recorded asset, depreciation and noncurrent liability.

As of December 31, 2018 and 2017, the ARO has a carrying value of nil and P22.6 million, respectively (see Note 15).

Estimating Realizability of Deferred Income Tax Assets. The Parent Company reviews the carrying amounts of deferred income tax assets at each reporting date and reduces deferred income tax assets to the extent that it is no longer probable that sufficient taxable profit will be available to allow all or part of the deferred income tax assets to be utilized. However, there is no assurance that the Parent Company will utilize all or part of the deferred income tax assets. The Parent Company's assessment on the recognition of deferred income tax assets on deductible temporary differences is based upon the likely timing and level of future taxable profits determined from the tax planning strategies of the Parent Company. The Parent Company elected to avail of the Optional Standard Deduction (OSD) starting 2010 and plans to avail of such in certain number of years thereafter. Thus, certain deferred income tax assets were measured on this basis. The Parent Company has deferred income tax assets amounting to nil and P6.8 million as of December 31, 2018 and 2017, respectively (see Note 22).

Determining Fair Value of Financial Assets and Financial Liabilities. PFRS requires that certain financial assets and liabilities be carried at fair value, which requires extensive use of accounting estimates and judgment. While significant components of fair value measurement were determined using verifiable objective evidence (i.e., foreign exchange rates, interest rates, volatility rates), the amount of change in fair value would differ if the Parent Company utilized a different valuation methodology. Any change in fair value of these financial assets and liabilities would affect the parent company statement of comprehensive income and the parent company statements of changes in equity.

Fair value of financial assets as of December 31, 2018 and 2017 amounted to \$\mathbb{P}2,619.2\$ million and \$\mathbb{P}1,161.2\$ million, respectively. Fair value of financial liabilities as of December 31, 2018 and 2017 amounted to \$\mathbb{P}46.6\$ million and \$\mathbb{P}773.0\$ million, respectively.

Cash and Cash Equivalents

This account consists of:

	2018	2017
Cash on hand and in banks	₽354,234,824	₽786,755,353
Short-term investments	1,847,153,269	261,080,011
	£2,201,388,093	₱1,047,835,364

Cash in banks earn interest at the respective bank deposit rates. Short-term investments are made for varying periods of up to three months or less, depending on the immediate cash requirements of the Parent Company, and earn interest at the prevailing short-term investment rates. Total interest income earned amounted to ₱41.2 million, ₱10.6 million and ₱16.9 million in 2018, 2017 and 2016, respectively.

5. Related Party Transactions

Parties are considered to be related if one party has the ability, directly or indirectly, to control the other party in making financial and operating decisions or the parties are subject to common control or common significant influence. The Parent Company, in the normal course of business, has significant transactions with related parties which principally consist of the following:

- Management services rendered to SPC Island Power Corporation (SIPC) where management fee earned by the Parent Company amounted to ₱0.4 million in 2018, 2017 and 2016 is included as part of "Others - net" in the parent company statements of comprehensive income.
- Extension of noninterest-bearing advances to SIPC for working capital requirements and receivables relating to the purchase of materials and supplies made by the Parent Company on behalf of SIPC. Outstanding receivables related to these transactions amounted to P351.4 million and P0.6 million as of December 31, 2018 and 2017, respectively.
- Extension of short-term, noninterest-bearing advances to KEPCO SPC Power Corporation (KSPC), an associate, for the development of the 2x100 MW Circulating Fluidized Bed Combustion (CFBC) Boiler Coal-Fired Power Plant in Naga, Cebu. Outstanding advances to KSPC amounted to ₱0.7 million as of December 31, 2018 and 2017.
- Extension of noninterest-bearing advances to Bohol Light Company, Inc. (BLCI) for working capital requirements. Outstanding advances amounted to ₱0.2 million and ₱0.1 million as of December 31, 2018 and 2017, respectively.
- Rendering of management and other services to MECO, an associate, amounting to ₱120.0 million, ₱100.0 million and ₱54.5 million in 2018, 2017 and 2016, respectively, is recorded as "Service income" in the parent company statements of comprehensive income.
- Cash dividends received from associates (KSPC and MECO) amounted to ₱1,409.8 million, ₱1,028.3 million and ₱213.4 million in 2018, 2017 and 2016, respectively (see Note 10).
- Cash dividends received from subsidiaries, SIPC, BLCI, SPC Electric Company, Inc.(SECI), SPC Malaya Power Corporation (SMPC), and SPC Light Company, Inc. (SLCI) amounted to
 - ₱387.6 million, ₱726.4 million and ₱506.2 million in 2018, 2017 and 2016, respectively (see Note 11).
- Lease of office spaces from SPC Properties Development Corporation (SPDC) and SPEC Properties, Inc. (SPEC). The aggregate rental expense amounted to ₱4.0 million in 2018 and ₱3.9 million in 2017 and 2016 (see Note 19). Outstanding payable totaled to ₱1.3 million and ₱0.7 million as of December 31, 2018 and 2017, respectively.
- Extension/availment of noninterest-bearing advances to/from related parties for working capital requirements.

The results of these transactions are presented in the appropriate accounts in the Parent Company financial statements. The amounts of due from/due to related parties and trade and other receivables follow:

^{**} Under "Due from related parties"

*** Under "Due to related parties"

**** Under "Trade and other payables"

6. Trade and Other Receivables

This account consists of:

	2018	2017
Receivable from:		
National Grid Corporation of the Philippines		
(NGCP)	P11,396,811	₱57,669,068
Philippine Electricity Market Corp. (PEMC) (net		
of allowance for impairment of \$3.8 million		
and ₱1.4 million in 2018 and 2017,		
respectively)	4,738,466	23,759,928
Contractors and suppliers	5,181,718	4,711,000
SIPC (see Note 5)	34,911	
Others	20,275,558	21,967,802
	P41,627,464	₱108,107,798

Receivable from customers arises from generation and sale of energy, and from provision of ancillary services.

Others mainly consist of advances to suppliers and contractors for refund in relation to services that will no longer be availed by the Parent Company, officers and employees, insurance claims and accrued interest receivables from short-term investments.

Allowance for impairment losses pertains to trade receivables that are individually determined to be impaired at reporting date. These relate to debtors who are either in significant financial difficulties, have defaulted on payments or whose accounts are under dispute and legal proceedings. These receivables are not secured by any collateral or credit enhancements.

Additional allowance for impairment loss amounting to \$\frac{P}{2}\$.4 million and \$\frac{P}{1}\$.4 million were provided in 2018 and 2017, respectively (see Note 19).

The following table shows the movement in the allowance for impairment:

	2018	2017
At January 1	P1,400,000	₽_
Provision (see Note 19)	2,375,422	1,400,000
At December 31	P3,775,422	₽1,400,000

7. Due from and Due to NPC/PSALM

This account consists of:

	Due from NPC/PSALM		Due to NPC/PSAI	
	2018	2017	2018	2017
Cost of fuel purchases and others				
(see Note 26)	₽	₽-	P-	₱511,650,588
Others	1,175,128	1,175,128		
	P1,175,128	₱1,175,128	₽_	₱511,650,588

Cost of fuel purchases and other adjustments substantially pertains to the cost of fuel used in the operation of the NPPC. Based on management's assessment of the timing when these are to be settled, cost of fuel purchases and other adjustments amounting to \$\mathbb{P}\$511.7 million as of December 31, 2017 were presented as current liabilities (see Note 26).

Others mainly consist of outstanding amounts reimbursable by PSALM for other services rendered under Operation and Maintenance Service Contracts (OMSC).

8. Materials and Supplies

This account consists of:

	2018	2017
On hand - at NRV (net of allowance for inventory		28
losses of nil and \$85.5 million as of		
December 31, 2018 and 2017, respectively)	£40,990,502	P315,966,917
In transit - at cost	15,493,793	2,557,385
At lower of cost and NRV	P56,484,295	₱318,524,302

Materials and supplies include fuel, lubricants, chemicals, spare parts, supplies and other consumables used in the operations, repairs and maintenance of the power generation and plant, property and equipment.

The cost of materials and supplies recognized as other charges amounted to \$\text{P135.6}\$ million and \$\text{P325.7}\$ million in 2018 and 2017, respectively (see Note 26) and "Cost of services" amounted to \$\text{P13.2}\$ million, nil and \$\text{P167.6}\$ million in 2018, 2017 and 2016, respectively, in the parent company statements of comprehensive income (see Note 18).

9. Prepayments and Other Current Assets

This account consists of:

	2018	2017
Input VAT	P39,833,905	P58,978,672
Prepaid rent	2,378,872	2,843,872
Prepaid insurance	3,861,642	2,095,486
Deferred input tax	919,740	863,866
Others	1,235,259	55,755,420
	₽48,229,418	P120,537,316

As of December 31, 2017, "Others" mainly consists of deferred input VAT of fuel owned by PSALM used in the operations of NPPC but still to be invoiced to the Parent Company. Payment was received in 2018 upon the turnover of NPPC (see Note 26).

10. Investments in Associates

The Parent Company's associates, corresponding equity ownership and acquisition cost follow:

	Principal Activity	% of Ownership	2018	2017
KSPC	Power generation	40.0	P2,472,464,616	P2,472,464,616
MECO	Power distribution	40.0	380,000,752	380,000,752
			P2,852,465,368	P2,852,465,368

KSPC

Summarized financial information pertaining to KSPC as of and for the years ended December 31 follows:

	2018	2017
Statements of financial position:		
Current assets	P3,438,166,969	₱3,026,153,666
Noncurrent assets	11,186,531,787	11,862,369,837
Current liabilities	895,386,982	688,867,772
Noncurrent liabilities	730,253,027	714,506,077
Equity	12,999,058,746	13,485,149,654
Statements of comprehensive income:		
Revenue	8,812,187,718	8,317,177,602
Gross profit	3,559,735,642	3,708,509,782
Net income	2,841,290,406	2,563,051,257
Other comprehensive income (loss)	775,628	(215,914)
Total comprehensive income	2,842,066,034	2,562,835,343

KSPC declared and paid eash dividends to the Parent Company amounting to ₱1,329.8 million, ₱968.3 million and ₱133.4 million in 2018, 2017 and 2016, respectively (see Note 5).

MECO

Summarized financial information pertaining to MECO as of and for the years ended December 31 follows:

	2018	2017
Statements of financial position:		
Current assets	P2,655,644,061	₱2,539,970,643
Noncurrent assets	2,903,998,249	2,135,870,438
Current liabilities	932,821,162	699,418,468
Noncurrent liabilities	2,348,278,665	1,799,843,043
Equity	2,278,542,483	2,176,579,570
Revaluation increment on property, plant	A 88 S	18 18 8
and equipment, and others	188,241,004	209,371,063
Statements of comprehensive income:		
Revenue	6,350,888,911	5,324,917,027
Gross profit	338,144,507	209,173,187
Net income	292,053,994	250,336,245
Other comprehensive loss	1,678,140	(479,591)
Total comprehensive income	293,732,134	249,856,654
Income after adjustment of depreciation	5% 68	Ø ₩
on appraisal increase and others	322,239,793	280,522,042

MECO declared and paid cash dividends to the Parent Company amounting to P80.0 million, P60.0 million and P80.0 million in 2018, 2017 and 2016, respectively (see Note 5).

The carrying value of the investment in KSPC and MECO is reviewed at each reporting date whether the investment account is impaired. Based on management's assessment, no impairment was recognized in 2018, 2017 and 2016.

11. Investments in Subsidiaries

Details of the Parent Company's investments in subsidiaries as of December 31, 2018 and 2017 are as follows:

		% of Ownership			
	Principal Activity	Direct	Indirect	Total	Amount
SIPC	Power generation	100.00%		100.00%	₱274,999,995
BLCI	Power distribution	39.90%	13.76%	53.66%	45,653,125
SLCI	Holding company	40.00%	24.00%	64.00%	12,609,198
SECI	Holding company	40.00%		40.00%	7,565,518
CNPC	Power generation	100.00%		100.00%	249,995
SMPC	Power generation	40.00%		78.40%	99,998
			77.11.		₽341,177,829

Cash dividends declared by the subsidiaries in the last three years are summarized as follows:

	Date of Declaration		Amount		
Declared By		Record Date	Gross (in millions)	Per Share	
2018					
SIPC	November 28, 2018	December 12, 2018	₱350.0	₱14.0 (common)	
SLCI	November 28, 2018	December 20, 2018	40.0	1.27	
BLCI	April 12, 2018	April 16, 2018	30.0	0.40	
	December 10, 2018	December 14, 2018	10.0	0.13	
SECI	November 28, 2018	December 20, 2018	14.0	0.74

The Parent Company has determined that the highest and best use of its noncurrent assets held for sale is its current use.

The ARO related to the disposal group has been remeasured to P2.2 million, resulting to reversal of ARO amounting to P21.3 million. The ARO is presented as liabilities directly associated with noncurrent asset held for sale in the parent company statements of financial position (see Note 15).

Cost of fully depreciated property, plant and equipment that are still being used by the Parent Company amounted to ₱35.9 million and ₱51.6 million as of December 31, 2018 and 2017, respectively.

13. Other Noncurrent Assets

This account consists of:

	2018	2017
Investment in proprietary club shares	₽6,500,000	P1,300,000
Software costs (net of accumulated amortization of		6
P1.8 million and P1.2 million in 2018 and 2017,		
respectively) (see Note 21)	4,257,760	4,866,011
Noncurrent receivable (see Note 26)	16721160770	1,143,240,000
Others	6,602,953	5,937,327
	P17,360,713	P1,155,343,338

As of December 31, 2017, investment in proprietary club shares has a carrying value of P1.3 million. Upon adoption of PFRS 9 effective January 1, 2018, the Parent Company recognized transition adjustments of P3.7 million directly charged to the Parent Company's beginning other comprehensive income and P1.5 million recognized as "Unrealized valuation gain on financial asset at FVOCI" in the 2018 parent company statement of comprehensive income.

Others mainly pertains to Investment in Casureco IV amounting to P5.5 million and other assets amounting to P1.0 million

14. Trade and Other Payables

This account consists of:

7	2018	2017
Trade	P27,684,826	P232,908,105
Nontrade	20,112,597	33,965,831
Accrued expenses	17,182,243	24,732,144
	₽64,979,666	P291,606,080

Trade payables pertain to purchases of goods and services. These are noninterest-bearing and are normally settled on 30-60 days terms.
